

SPONSOR-BANK BRIEFING · DOMINICAN REPUBLIC

Card acceptance built for gasoline stations.

A fuel-retail acquiring program for the Dominican Republic, cleared in US dollars and operated by Wallet Partners LLC under the sponsorship of a licensed member bank.

Executive summary

Three things to take away from this briefing

The moment

- In July 2026 fuel retailers (ANADEGAS) threatened to pull card terminals from 780+ stations over 1.95-2.50% fees.
- Those fees equal RD\$6.59-8.45 per gallon: 25-36% of a State-set RD\$25 gross margin.
- Government-brokered talks with the banks are ongoing; the segment asked for per-gallon pricing.

The program

- Wallet Partners operates as payment facilitator / program manager under your membership and oversight.
- Merchant pricing 25 bps below each station's current contract, no monthly minimum, terminals on monthly rental, transactions cleared in US dollars.
- Launch cohort: 20 stations in Santo Domingo's Polígono Central, 9 of them open 24 h.

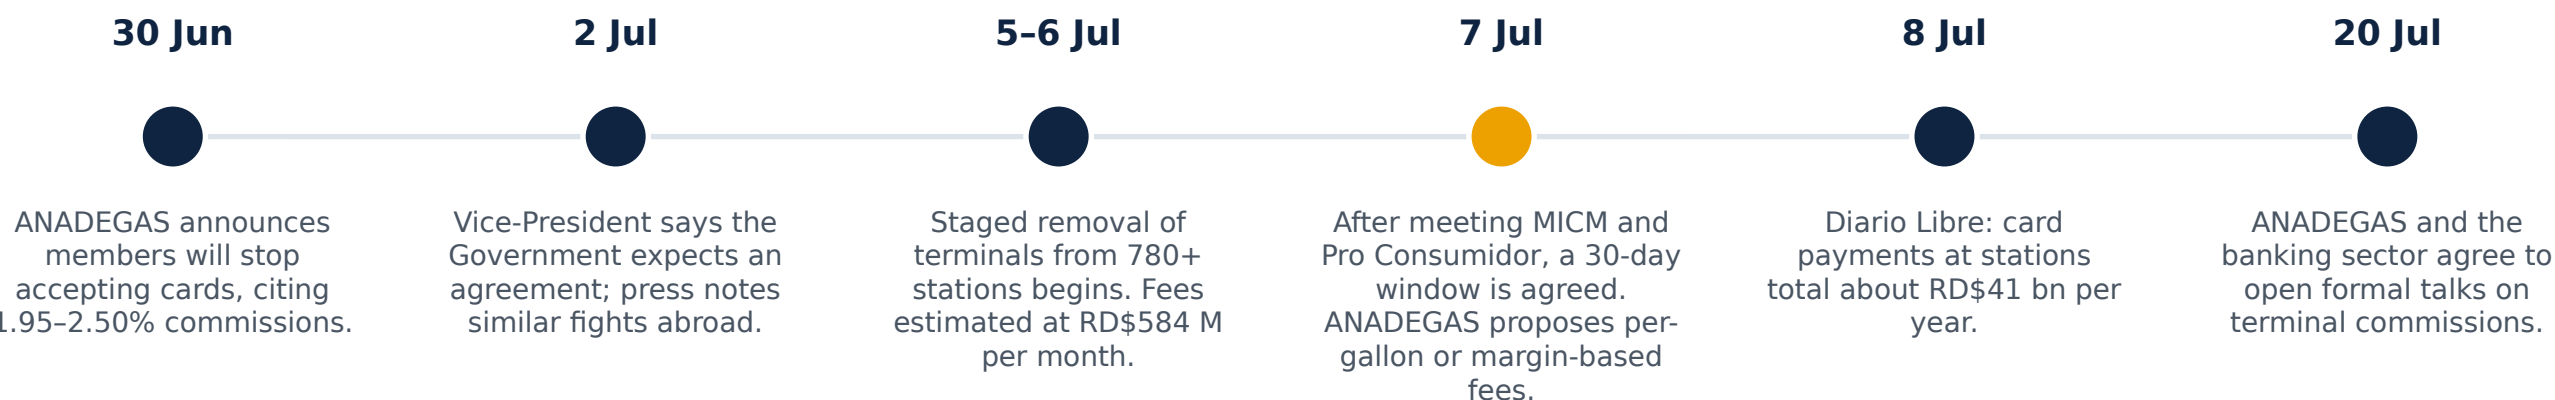

The ask

- Sponsorship agreement and registration of Wallet Partners as payment facilitator.
- Program settlement account with agreed reserves; merchant approval SLA of 10 business days.
- Named relationship and compliance contacts. Target: first live station within one quarter.

The moment: retailers went public on card fees

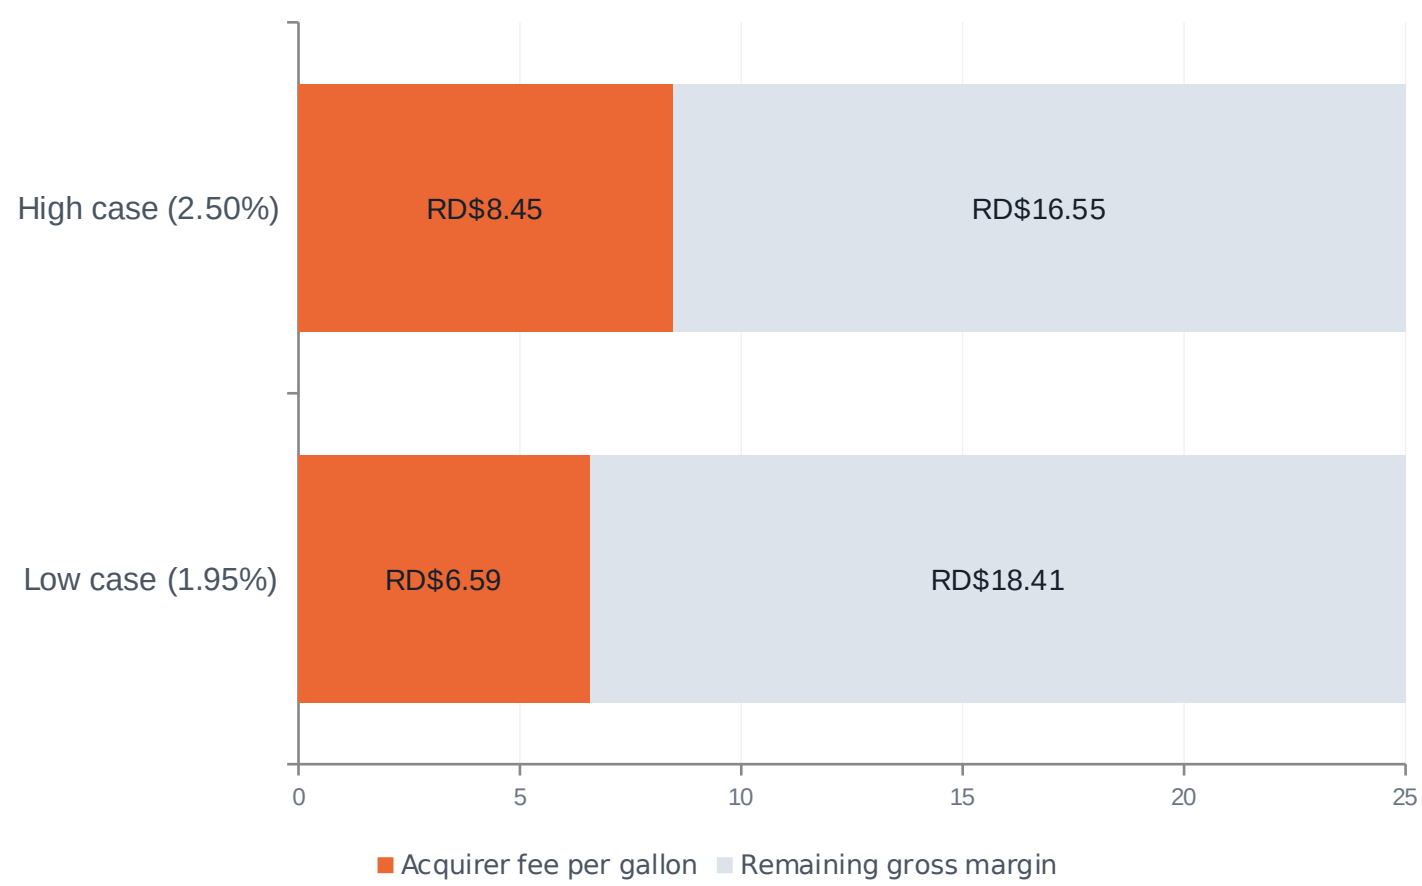

Timeline of the June–July 2026 dispute between ANADEGAS and the acquirers

Why it matters to a sponsor. The retailers' own numbers show that price, not card acceptance, is the issue. A program priced 25 bps below each station's current contract, with no monthly minimum, gives a bank a defensible way to grow fuel-segment volume while the incumbents are locked in a public dispute with the segment.

Card fees take a quarter to a third of gross margin

Pesos per gallon: acquirer fee versus what the station keeps, on a regulated gross margin of about RD\$25

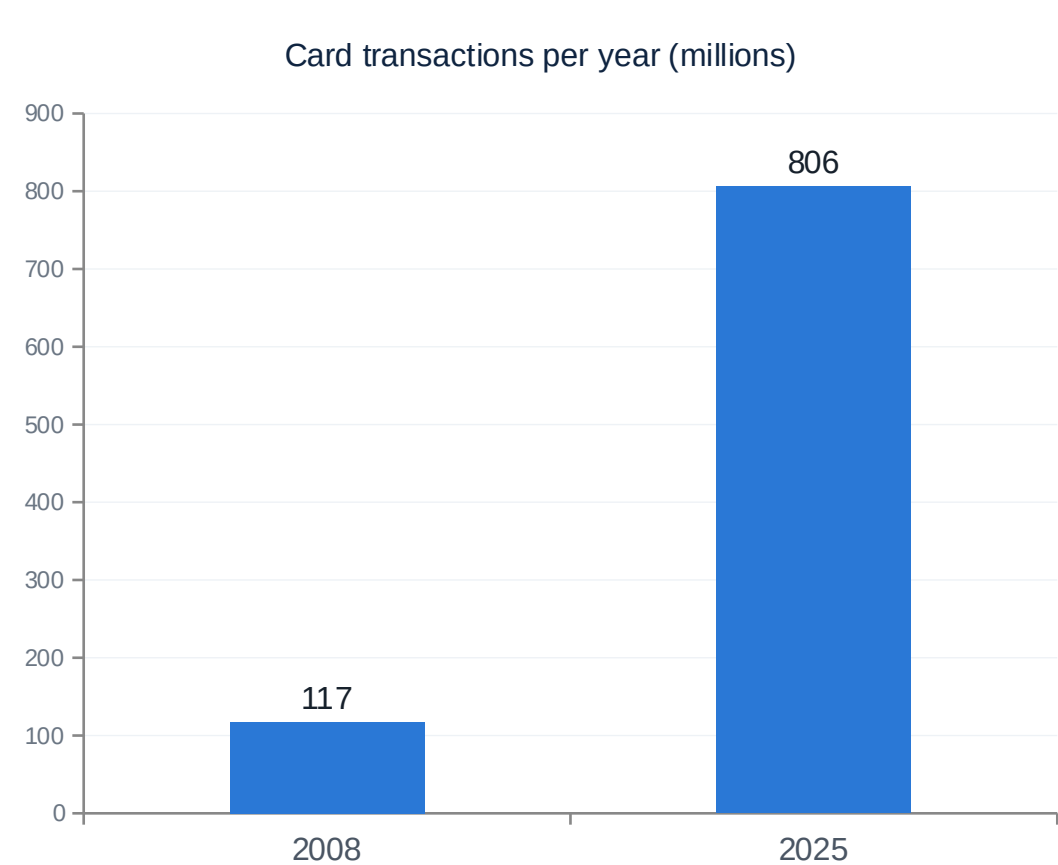

25-36%
of gross margin goes to card fees
ANADEGAS, July 2026

RD\$6.59-8.45
per gallon at 1.95-2.50%
Infobae / Diario Libre, Jul 2026

RD\$5-6 bn
paid yearly in commissions by stations
≈RD\$584 M per month

The card economy keeps compounding

Banco Central data: a payments market still early in its shift from cash

Q1 2026, +31%

Fuel retail: regulated, price-controlled, high volume

A concentrated market with three incumbent acquirers and no vertical product

≈1,025 stations

ANADEGAS estimate for the country; 780+ affiliated. MICM approved 33 new stations and LPG plants in 2024-Oct 2025 and keeps an open registry. Every new licence must pick an acquirer on day one.

Three acquirers

CardNET (bank-owned), AZUL (Grupo Popular, 2014) and Visanet Dominicana. All three price fuel like any other retail category; none offers a fuel-specific program, fleet cards or forecourt integration.

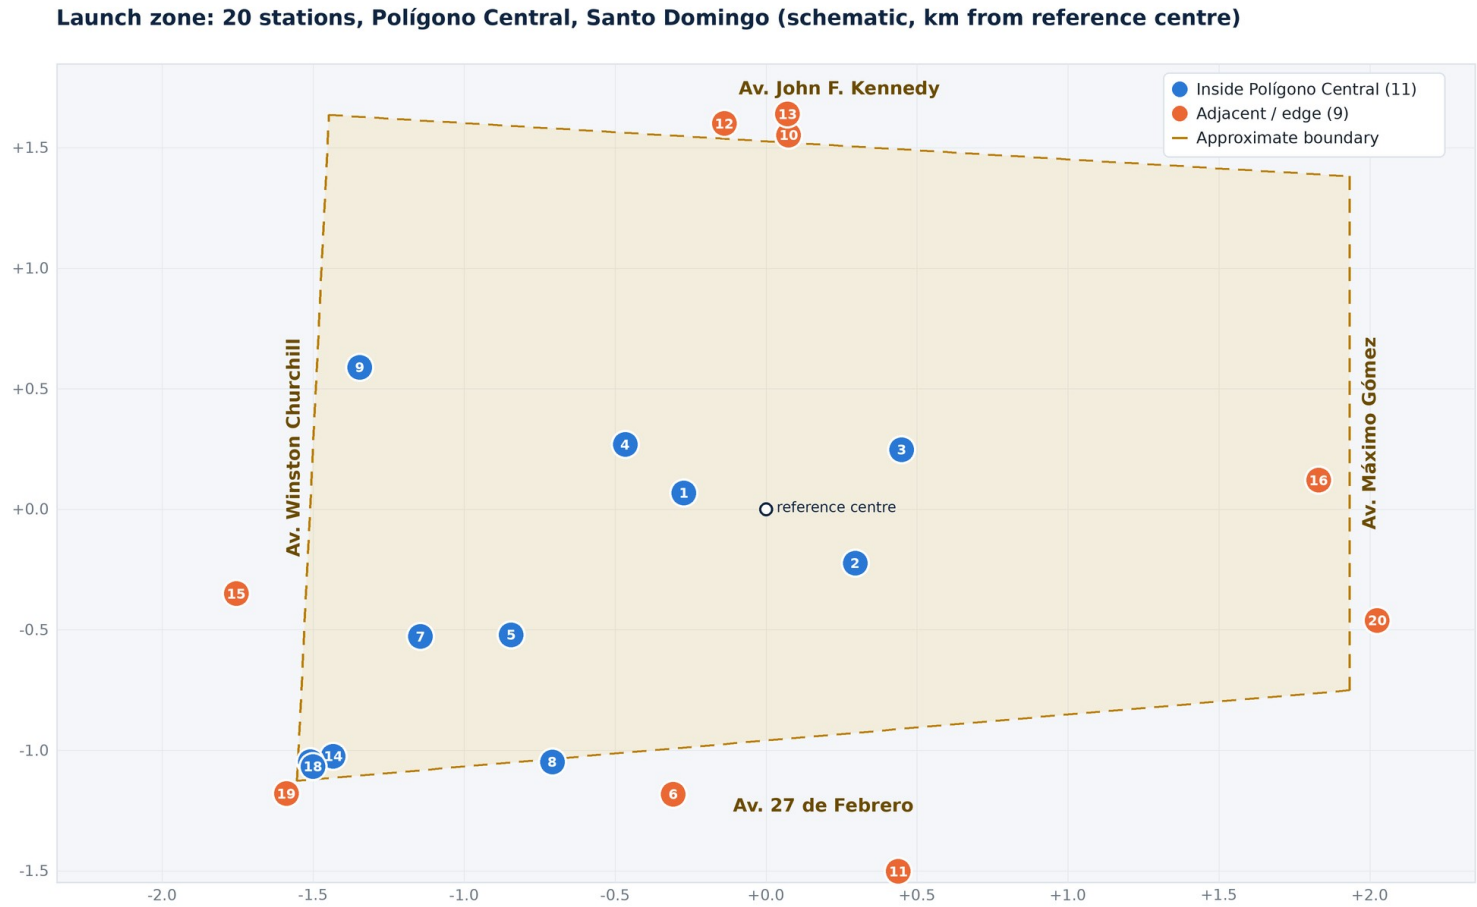

Weekly price setting

MICM publishes retail prices every week. 2025: premium RD\$290.10, regular RD\$272.50 per gallon. Price and margin are fixed; the percentage fee is the only cost the station cannot control.

Indicator	Value	Period
Card payments at fuel stations	≈RD\$41,000 MM per year	2026 (Diario Libre)
Commissions paid by stations	≈RD\$584 MM / month; RD\$5-6 bn / year	2026 (Diario Libre)
Fee per transaction	1.95%-2.50%	2026 (ANADEGAS)
Implied card volume per station	≈RD\$40 MM / year (≈RD\$3.3 MM / month)	RD\$41 bn ÷ ≈1,025 stations

Launch cohort: 20 stations in one district

Santo Domingo's Polígono Central, bounded by Av. Kennedy, 27 de Febrero, Churchill and Máximo Gómez

20

stations within 2.1 km of the centre

11 inside the polygon, 9 adjacent

9

open 24 hours

45% of the cohort

11

fuel brands

TotalEnergies 9, Next 2, nine others

Warm pipeline: these stations have indicated they are ready to sign once the sponsorship and merchant-of-record arrangement are in place. Merchant files are being assembled to the bank's standard.

How a transaction flows

Wallet Partners runs the merchant side; the sponsoring bank holds membership, funds and oversight

Who does what

Division of responsibilities between Wallet Partners LLC and the sponsoring bank

Function	Wallet Partners LLC	Sponsoring bank
Card-network membership and BINs	—	Holds membership; registers Wallet Partners as payment facilitator
Merchant prospecting and sales	Owns pipeline and station relationships	—
Merchant KYC/KYB and underwriting	Collects documents, screens owners and sanctions lists, prepares file	Approves, conditions or declines each merchant
Terminals and integration	Supplies certified EMV/contactless terminals; installs and supports	Certifies terminal and gateway on its host
Pricing to the station	Quotes 25 bps below the station's current contract, no monthly minimum, terminal rental	Approves pricing floors and interchange pass-through
Settlement	Pays stations in US dollars from program account; maintains reserves	Settles network funds into program account; controls the account
Transaction monitoring and AML	First-line monitoring, alerts, escalation	Second-line review; regulatory reporting
Disputes and chargebacks	Representment and merchant recovery	Network-facing dispute processing
PCI DSS	Own compliance; P2PE terminals, no cardholder data stored	Validates Wallet Partners as service provider
Audit and oversight	Records access, monthly reporting, right-to-audit	Periodic reviews; can suspend merchants or program

What the station gets

A product built around forecourts, night shifts and a simple price

Illustrative image

25 bps below today

Rate 0.25 points below the station's current contract, no monthly minimum; interchange-plus statements the owner can compare line by line.

Cleared in dollars

Transactions cleared in US dollars, per station, with shift-level reconciliation; terminals on monthly rental with replacement included.

Forecourt-ready terminals

Rugged wireless EMV/contactless, pre-auth and completion, Spanish prompts, pump-controller integration where supported.

Owner dashboard

Sales by pump, shift and product; card mix; chargebacks; statements formatted for the accountant and DGII.

Fraud and dispute desk

Velocity limits per pump and card, EMV liability-shift compliance, disputes worked on the station's behalf.

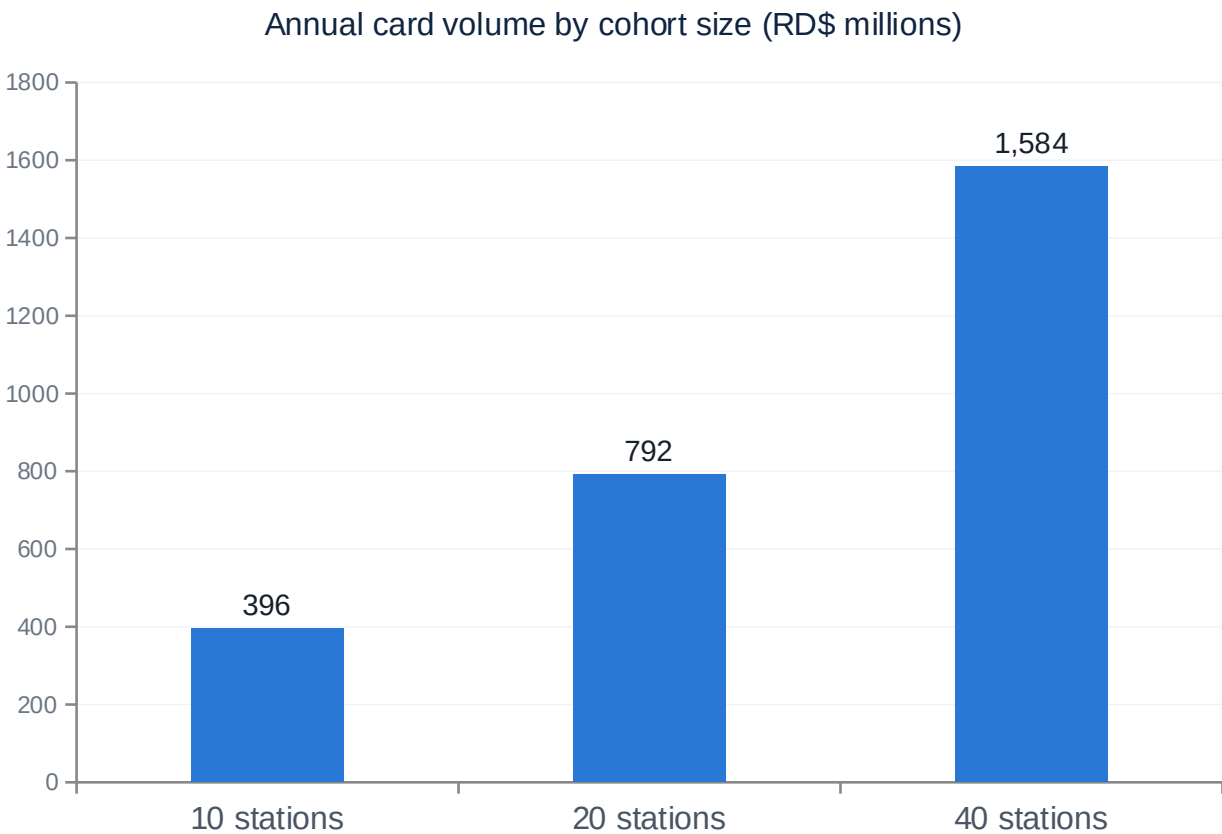

Fleet and loyalty ready

Phase two adds fleet-card acceptance and station loyalty, with issuing and co-brand upside for the bank.

What the launch cohort could represent

Illustrative scenarios, not a forecast. Assumptions are editable in the website calculator.

Scenario	Annual volume	Gross MDR @1.95%	US\$ equiv.
10 stations	RD\$396 MM	RD\$7.7 MM	US\$125 k
20 stations	RD\$792 MM	RD\$15.4 MM	US\$249 k
40 stations	RD\$1,584 MM	RD\$30.9 MM	US\$498 k

Assumptions. Card volume per station RD\$3.3 MM per month, the national average implied by RD\$41 bn a year across about 1,025 stations; Polígono Central sites are expected to run above it. Effective MDR 1.95%, i.e. 25 bps below a station currently paying 2.20%. Exchange rate RD\$62 per US\$. Interchange, network fees, terminal costs and the bank's share are not deducted; the revenue split is a negotiation item.

Compliance framework

Built to the standard a sponsoring bank's second line will require; validated before the first live transaction

Dominican Republic

- Law 183-02 and the Monetary Board's Payment Systems Regulation (SIPARD, amended Aug 2025); BCRD oversight, Superintendencia de Bancos supervision of the sponsor.
- Law 155-17 AML/CFT: merchant due diligence, beneficial owners at 10% +, monitoring, 5-10 year record-keeping, STRs through the bank to the UAF.
- Law 172-13 data protection; Law 358-05 consumer protection (Pro Consumidor).
- DGII card-withholding rules (Norma 08-04 and successors) reconciled with the fuel tax regime (Laws 112-00 / 557-05); parameters confirmed with the bank and tax counsel.
- Only stations with a valid MICM operating resolution are eligible.

United States and international

- BSA/AML programme aligned with the sponsor; FinCEN registration where applicable; OFAC and sanctions screening of all merchants and owners.
- Visa Core Rules and Mastercard Rules for payment facilitators; MCC 5541/5542; AFD authorisation and completion rules; MATCH checks.
- PCI DSS v4.0 as a Level 1 service provider; P2PE terminals; no PAN, track or CVV stored.
- Information security: segmented cloud, encryption at rest, dual-control keys, MFA, central logging, annual pen test, incident-response plan with agreed notification timelines.
- Governance: compliance officer, board-approved policies, annual independent review, staff training, contractual right-to-audit for the bank.

From sponsorship to live stations in one quarter

Staged go-live inside the Polígono Central, then expansion on the same playbook

1

Weeks 1-4

Program set-up

Sponsorship agreement; payment-facilitator registration; gateway and terminal certification on the bank's host; program account and reserve structure.

2

Weeks 3-8

Merchant underwriting

Bank review of the 20 pipeline files; site surveys; connectivity checks; terminal provisioning.

3

Weeks 8-12

Staged go-live

Five stations inside the polygon in wave one, then the remaining fifteen in two waves. Daily settlement and monitoring from the first transaction.

4

Quarter 2+

Expansion

Rest of Distrito Nacional and Santiago; fleet cards; pricing review with the bank against actual interchange.

THE ASK

A sponsorship agreement, then one merchant file at a time.

- Visa and Mastercard acquiring membership in the DR, or a correspondent arrangement permitting program sponsorship
- Registration of Wallet Partners LLC as payment facilitator / program manager
- Program settlement account with agreed reserve and release terms
- Merchant-approval SLA of ten business days per file
- A named relationship contact and a compliance contact

Proposed next steps

- NDA and exchange of the document set (AML programme, underwriting policy, PCI plan, reserve model)
- Working session with merchant-acquiring and compliance teams, in English or Spanish
- Joint review of three sample merchant files from the cohort
- Draft term sheet within 30 days of the working session
- Target: first live station within one quarter of signature
